Full Cassette Awning

Electric/Light/Energy Saving/All-in-one Seal

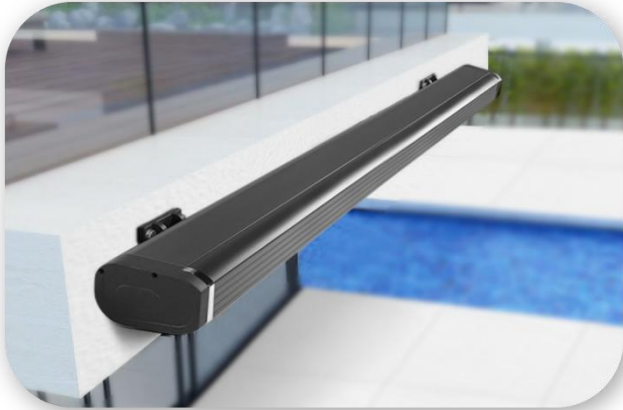

Full Cassette Awning

Awnings can also be high-end

- As a new generation of telescopic awning products, the full box awning is much more advanced than the traditional telescopic awning in shape design, technological intelligence and durability.
- With the all-in-one box design, the cloth and the curved arm can be fully packed into the box, which can not only play a protective role, but also make the whole product look more neat and beautiful. The beautiful lines and smooth architecture complement each other, and the aesthetic feeling is full.
- The appearance of the full-box awning makes the application of high-end outdoor space more rich, the modeling is brief, the installation occupies less area, without affecting the original landscape structure, to provide shading and rain services for the outdoor space, to create a more comfortable and advanced leisure space.

PRODUCT FEATURE

Full box design

Integrated closed design, better protect the parts and fabric, simple and beautiful shape, no need to install additional rain board, occupy small space.

Thickened stainless steel hinges

The curved arm joint adopts thickened stainless steel hinge and thickened spring, which makes the elastic force stronger and more durable.

Spanish fabric

High color fastness, 10 years will not fade.

LED waterproof light belt

Independent control lighting, using LED waterproof light belt, low energy consumption and more energy saving, 5000k brightness, three gears adjustable.

Hidden drain tank

Both ends of the front edge with drainage holes, to solve the traditional awning front floating water, wind blown into the malpractice

BALANCE system

Equipped with BALANCE balancing system, it can be accurately positioned, and the force is supported by the wall code, so the firmness and safety are guaranteed.

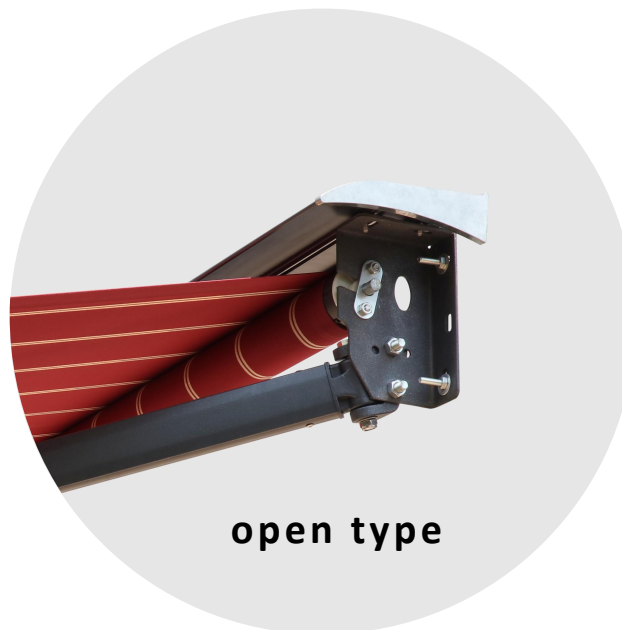

Integrated Seal Design

No additional rain baffle is required

The whole box design is adopted, and the cloth and the curved arm can be completely collected into the box. The rain baffle and the box body are also integrated design, and there is no need to install additional rain baffle, which makes the shape more beautiful.

open type

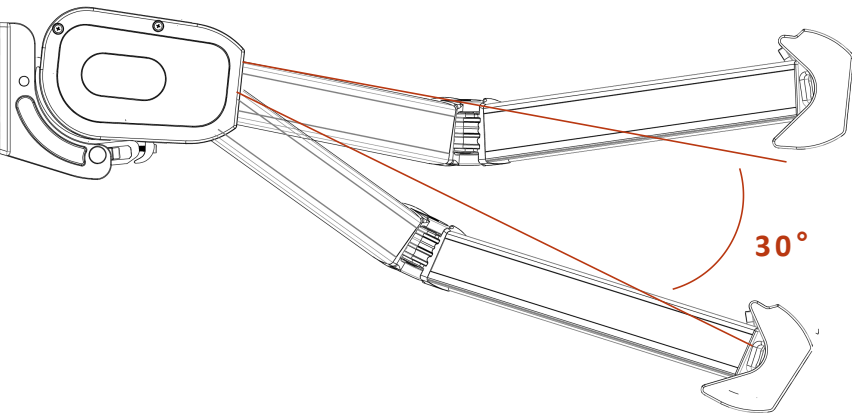

Upgrade balance system

Adjustable, more stable closing, longer life

Adopt the industry leading professional balance system, bend arm closure more stable, longer service life!

Adjustable up and down to a maximum of 30°.

New type

By adopting patented balance system, the upper and lower part of the bend arm can be adjusted by 30° for precise positioning, and the force of which is supported by the wall, which greatly improves the stability and firmness of the bend arm and can solve the problem of tight folding of the large size bend arm.

Old type

The old model adopts ordinary connection without any treatment. The bending arm is easy to loosen when using screws for a long time, which leads to the bending arm sagging, the whole box cannot be closed completely, and the stability is poor.

PRODUCT FEATURE

High quality aluminium alloy

High density powder spraying

The box body and bend arm are made of high-quality 6063 aluminum alloy with high strength and light weight. The surface is sprayed with polycrystalline diamond composite (PDC), plastic and resin mixed high-density powder, which makes the surface of the material corrosion-free, maintenance free, safe and environmental protection, formaldehyde-free, acid and alkali resistant for 20 years without fading.

Strict selection Quality fabric

99%

SPF

According to the fabric color, type can block 90%-99% UV, sunscreen effect is outstanding.

3 level

Waterproofing

Waterproof 3 level, no water leakage, anti fouling effect is remarkable

5~6

windproof

The wind resistance of the whole box can reach 5~6.

Spain Sauleda

European hundred years fabric family, top sunshade fabric brand,
ten years do not fade

The imported fabric is made of Sauleda fabric from Spain. The technical indicators of Sauleda fabric have passed the European ISO quality standard and Oeko-Tex environmental protection certification, and it is the high-quality choice of cloth for major outdoor sunshade products.
